

09/29/2020 - Customer Review Meeting #2

Last meeting we identified a list of features that this device should possess. Today we further refined these features into a [Requirements Outline](#). The goal is to work and massage these requirements to be as specific as possible, such that they may be smoothly translated into functions. Functions describe the behavior that satisfy the system requirements, and are mapped to the physical elements which facilitate those functions. Functional architecture is translated into physical architecture via the design process. [The Details...]
